

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **A. Conclusion**

Based on the results of research and development in the previous chapter, the researcher can conclude, as follows:

1. How to develop instructional material in learning writing descriptive text?

The process of developing the textbooks in the material for writing descriptive texts based on local wisdom of Banten, the research uses the R&D (Research and Development) research method using the ADDIE model development, namely Analysis, Design, Development and Evaluation. Based on the results of research and development carried out by researchers, then the product is tested on the validator, namely the lecturer. The results of the validation of textbook products as teaching materials in writing descriptive texts get a score 78% from material experts, with “good” categories. From media experts get a score 80% with “good” category.

2. How the quality of textbook as teaching material in learning writing descriptive text?

The results of the application of teaching materials Textbook in writing descriptive text materials to class X MA Nurul Huda, have increased after using the product. The results of the pre-test writing descriptive text students get an average score 60,19 and the post-test results after using textbook products as teaching materials in writing descriptive text materials students get an average score 77,71. After calculating the pre-test and post-test, then the T-test is calculated to get a significant result. in the calculation of the T-test the results obtained  $t_{hitung} 12.082 > 2.086 t_{table}$ , so,  $H_0$  is rejected and  $H_1$  is accepted. Therefore, there is a significant difference between students' scores before and after using textbook as teaching material in writing descriptive text. Meanwhile, the students' responses to textbooks in writing descriptive texts got an average score 82% in the “very good” category.

Based on the results of research and development conducted, it is stated that textbook as teaching materials in writing descriptive text based

on local wisdom of Banten, are appropriate to be used as learning materials.

## **B. Suggestions**

Based on the results of research and discussion, the researchers provide some suggestions as follows:

### 1. For students

It is expected that students will be more active in learning activities, especially in writing texts using English, so that they can improve their ability to write English texts.

### 2. For teachers

In the implementation of teaching and learning activities, teachers should pay attention to students who have difficulties in writing English texts.

### 3. For more developers

Doing better research and maximizing development in the form of learning media to be more effective and efficient.
