ACKNOWLEDGMENT

In the name of Allah, the merciful, the compassionate

There is no valuable words to be said but all praises be to all praises to be Allah, the almighty God, who has sent Muhammad, peace be upon him, to be his prophet and messenger for people all over the world. The writer realizes and feels very sure that without his blessing, mercy, and guidance, it would be possible for me myself to finish the paper.

Herewith I would like to express her profound gratitude, more than she can express, to Prof. Dr. H. Ilzamuddin, my first advisor, thank also go to Dr. H. Anita, S.S., M.Pd. my second advisor and as The Head of English Education Department for the correction and invaluable criticism.

Last, but far from least, her very sincere thanks especially go to her own beloved parents, and all of those who have helped her, who are not mentioned personally here, without their patience, guidance, and cooperation this thesis could never been written.

ABSTRACT

Sithi Alfiqaroh Suarti. 181230172. 2022. The Effectiveness Of Using Finger Puppet In Teaching Speaking Skill (A Quasi Experimental Study at the Second Grade of MTs Kulni Cikande Serang - Banten)

This study is designed to find out the effectiveness of using finger puppet in teaching speaking skill at the second grade students' of MTs Kulni Cikande. It is conducted based on the research questions 1) how is the students speaking skill in storytelling before using finger puppet media?., 2) to what extent finger puppet media is effective in improving students' speaking skill?., and the objective of study are 1) to analysis the students' speaking skill before using finger puppet media., 2) to examine whether the use of finger puppet media is effective to improve students' speaking skill. This study used an experimental research design and the data was collected from 42 students in two classes (experimental class and control class). The result of this study is showed from the data of pre-test and post-test score. It can be seen from the mean of pre-test score in experimental class (55,71), and the mean of post-test score (71,42). Meanwhile, based on the statistical calculation the value of t_o (3,48), and df (40) in significance 5% ($t_{table} = 1,68$) and significance 1% ($t_{table} = 2,42$). From comparing the t_o and t_{table} , the result is $t_o > t_{table} = 3,48 > 1,68$ and $t_o > t_{table} = 3,48 > 2,42$. It means that $t_{observation}$ (t_o) is higher than t_{table} (t_t), so Null Hypothesis (H_0) is rejected and Alternative Hypothesis (H_a) is accepted. It means that using finger puppet in storytelling has significant effect on improving students' speaking skill.

Key words: *finger puppet, speaking skill, storytelling.*
