

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusions

Based on the research finding that was presented in the previous chapter, the researcher would like to give conclusions as follow;

1. From pre-test and post-test between experimental and control class, the researcher has already known that students gave a treatment with taught by ABC Brainstroming method get better scores and more significant improvement their reading comprehension on narrative text than the students that did not give a treatment.
2. Based on the result of analysis about using ABC Brainstroming method in improving students reading comprehension on narrative text, showed that the distribution of score in experiment class was greater than control class. And the result of t-test shows that  $t_o:t_t = 5,05 > 1,67$ , in degree of significance 5% and  $t_o:t_t = 5,05 > 2,39$  in degree of significance 1% so that  $H_a$  (alternative hypothesis) of the result

is accepted and  $H_o$  (null hypothesis) is rejected. It means that The Effectiveness of Using ABC Brainstroming method has significant influence on improving students reading comprehension.

3. The Effectiveness of Using ABC Brainstroming method is a good method in improving students reading comprehension, it seemed from the result of test and learning process, explain to students that you want them to write a word related to the topic that begins with each letter of the alphabet could make students confident and have responsibility to do that test.
