

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research about “The Effectiveness of Using Previewing Toward Students’ Reading Comprehension and concerning to the result and discussion, the writer conclude that:

1. Students’ reading comprehension at the eighth grade of SMPN 3 Kota Serang before using previewing is low. It can be seen from the result of pre-test computation, it indicates that the average of pre-test in experiment class it can be seen from the result of computation in post-test. It indicates that the average score of experimental class (m) mean is 78, 1 it is higher than the controlled group m (mean) which 69. The data above show that there is significant difference between the experimental class and controlled class.
2. Using previewing is effective in students’ reading comprehension. It can be seen from the result of post-test was higher than students pre-test. The students’ lowest score of post-test at experimental class was 70 and the highest score was 95. The result of lowest of post-test at control class was 40, the highest was 80. The result of t_0 (observation) was 5. Then, researcher compared it with t_t

(table) both in degree significance 5% and 1%. Therefore, $t_o : t_t = 5 > 1, 67$ and $t_o : t_t = 5 > 2, 39$ in degree significance 1%. It means that the alternative hypothesis (H_a) is accepted and the null hypothesis (H_o) is rejected. It can be concluded that previewing strategy is effective on students' reading comprehension.

B. Suggestion

Based on the conclusion, the writer would like to give some suggestion, as follows:

1. English Teacher:

- a. An English teacher should use some teaching technique that appropriate with the material they want to deliver to students.
- b. An English teacher should motivate the students to develop their reading

2. Students:

- a. It is better for students to develop reading habit because every subject starts from reading text.
- b. To import reading comprehension the students should be exercise by answering the comprehension questions to help students more comprehend in reading assignment

- c. It is important for students to learn about reading. Not only add so many new vocabularies but also enhance their knowledge about English language.

3. Researcher

- a. For the other researchers, it is better to conduct the same research by integrating with other language skills and the result of the research can be used as a contribution of opinion that can be taken as references for another investigation in the same area in difference context.
- b. It is hoped that other researcher would do better research in the future.
