

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research findings and data interpretation in eighth grade at SMP Daarul Yaqiin Cipocok Jaya Serang, this research can be summarized into the following points:

1. Before treatment the students' in reading comprehension skills especially descriptive text was very lacking. This can be seen from the mean score pre-test results in the experimental class is 37.83. While reading comprehension skills increased after treatment using strategy PQ4R, it can be seen that there was an increase in the mean post-test of 78.16.
2. Based on the data analysis conducted using the t test, it shows that $t_0 > t_t$ or $13,75 > 1.67$. Based on the previous comparison, the t-test in accepting the alternative hypothesis (H_a) is accepted, the null hypothesis (H_0) is also rejected. In other words, it can be concluded that PQ4R strategy is significantly improves students' reading comprehension at the eighth grade of SMP Daarul Yaqiin Cipocok Jaya Serang.

B. Suggestion

1. For English Teacher

The English Teacher should do the best for developing teaching and learning process by performing better teaching methods and techniques to increase students interests when learning English. Therefore, for teachers must pay more attention to internal and external factors that can affect students' learning difficulties. This is in order to students can learn without difficulty because aspects that lead to students' learning difficulties has been already prevented and minimized.

2. For Students

Students should increase motivation in learning so they can enjoy the process of learning English more. Students must study and practice more in learning English. Do not afraid to ask your teacher to get information about the material. The students have to give their attention when the material is being explaining by the teacher in the classroom.

3. For Further Researcher

After researcher have conducted research on students' difficulties and the causes for them, it is hoped that the future

researcher will conduct the research about the learning strategies so that the students can overcome the difficulties that students face.
