

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the results of the data analysis, the researcher concluded that there were many difficulties faced by class VIII C students in mastering vocabulary. The data presented in the researcher's findings show that most students find it difficult to pronounce vocabulary correctly, then students also find it difficult to interpret every sentence they find, and find it difficult to find its meaning in the limited dictionary they have. In addition, students also find it difficult to memorize vocabulary because the vocabulary is not easy to remember.

Furthermore, the causative factors that make class VIII C students lack in mastering vocabulary are because students are lazy to study at home, are lazy to bring dictionaries in class in the learning process, are lazy to open dictionaries to look up the meaning of difficult vocabulary, lack of memorizing vocabulary and very influential factors, namely students rarely come to class and are less interested, not focused on learning English so their vocabulary mastery is low, lack of motivation from the teacher, uninteresting explanation from the teacher and limited learning media used by teachers during the learning process.

Based on the above problems, the researcher provide a solution to overcome the lack of vocabulary mastery of class VIII C students of Mts Nurul Muhtadin, namely by using wordwalls so that learning vocabulary in class is more meaningful and fun. as well as being able to use music as a learning medium so students don't feel bored and enthusiastic in learning English.

B. Suggestion

This study can be a source of knowledge about the factors causing students' lack of vocabulary mastery regarding the fact that there are many difficulties faced by students in learning English, especially vocabulary and the many factors that cause students to lack vocabulary mastery. So in this section the author tries to give some suggestions as follows:

1. For Students
 - a. Students must continue to be enthusiastic and not give up to continue studying Vocabulary.
 - b. Students must be diligent in memorizing vocabulary so that their vocabulary mastery skills increase.
2. For next researcher

The researcher recommends that this type of research on the factors causing the lack of vocabulary mastery be expanded into

experimental research to find out the right ways and solutions to deal with this problem so that it does not happen to students in the future.
