

CHAPTER V

CONCLUSION AND SUGESSTION

A. Conclusions

Based on the calculation of the data calculated in this research, a result of this research showed that the use of fondi application in improving students' speaking skills, it was shown that the result of t-test to test the hypothesis of this research had significance degree of 5%. The result by score of pre-test and post-test. Meanwhile, in experimental class the mean score of pre-test was 69,23 and in control class the mean of pre-test was 62,39 and score of post-test in experimental class of was 84,06 and score post-test in control class was 73,36. The hypothesis test used independent t-test, the result of this research showed that $t_{count} > t_{table}$ ($8,402 > 1,670$). It means that t_{count} was higher than t_{table} . So, the null hypothesis (H_0) is rejected. It means alternative hypothesis (H_a) is accepted. Based on the result of the researcher, the researcher conclude that there is any effectiveness of using fondi application in improving students speaking skill. Therefore, the researcher concluded that there was significant effectiveness to improve students' speaking skill by using fondi application.

B. Sugesstion

In teaching and learning teacher should be able to make the activity of teaching learning becomes enjoyable and fun for students. Therefore, the students do not feel bored easily when they have to find idea to tell the story especially in letter and have a high motivation in learning it. The teacher can be able to evaluate or give feedback after process teaching and learning by using fondi application as media toward students' speaking skill.

Based on the result of the research, the researcher would like to give some suggestion as follow:

1. For the teacher, the teacher observe what the students need in language class and encourage students to improve and make the effective in speaking learning process. Besides, the teacher should be more creative in choosing the media in speaking class on the study letter to make students interest in learning process by

using fondi application as media. Therefore, by using fondi application can make effective towards students' speaking ability. So, it influenced in improvement in ability.

2. For the other researcher, the other researcher can develop and their own research dealing with fondi application that are used to make the effective students' speaking skill. Hopefully, it will better than this research, the teacher and the students would get some explanation and information in detail.
