

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusion

Based on the result of this research, almost all of the students have good result in self-confidence for speaking skill.

1. This study found that 27 of 30 students categorized into four main indicator to measure self-confidence from Confidence in ability independently, Act independently when taking Decision, have positive attitude and principal and Dare to express opinions. In general, the students self-confidence that the student always show that the students have self-confidence in speaking skill.
2. Also there are explanation from interview why the students have self-confidence in speaking skill, all of the students show positive answer about self-confidence, the students have motivation to learn and practice their speaking skill that prove when learning activities also by many experience whether in class or outside of class activities. Academic achievement depends on the students' enthusiasm and motivation that related to the students' self-confidence.

B. Suggestion

1. Teacher

For the teacher to always pay attention for the students and involved all of the students to keep active take turn for the other students get same opportunity to share Idea, and give motivation for the students about how important to have self-confidence.

2. Students

For the students to keep practice and improve speaking skill and maintain self-confidence in speaking. The students can learn in various media including social media from the people that expert in this field.

3. Other Researcher

For the other researcher with the same theme to conduct research in different level especially in junior high school that seldom held. Hopefully the other researcher can explore more that not yet found about students self-confidence.
