

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusions

After conducting the reseach at SMP IT AL-HUSEIN it is possible to infer that Using Visualization Strategy With Pop-Up Book Media in teaching Narrative Writing Skill has a beneficial impact on the learning of class VIII students.

- This is proved by the hypothesis test results, which reveal that the significance value attained is 0.000, which is less than the significance level of 0.05.
- Aside from that, the average post-test results, particularly teaching using Pop-Up book media are 1.235, with the maximum score being 18 and the lowest score is 8.

Researchers have limitations in carrying out research among others:

- There is limited research time, because this research also adapts to the school's schedule, the researcher only carries out research based on the time determined by the school.
- Students as research subjects, even though in one class they are differentiated between genders, of course they have differences. Students who are used as a control group tend to be more difficult to control. This causes research limitations.

B. Suggestion

Based on the conclusions above, it can be delivered some suggestion that might be useful. The suggestion are for teacher and student. As a follow :

1. For Teacher :

- a. The use of media that the researcher uses in teaching students at SMP IT AL-HUSEIN should be further developed because it makes it easier for teachers to encourage students to concentrate on listening and watching with the help of images that appear and are in three-dimensional (3D) form.
- b. Careful preparation is required in implementing this media so that it is in accordance with the goals to be achieved.
- c. In studying English especially when writing section, teacher should more creative to make student active in learning.

2. For Students :

- a. The student should read more a lot of English text.
- b. There are still many narrative stories that are more interesting and entertaining. visualize the story and learn to put it into writing.

3. For Future Research :

This media cannot stand alone, and not all materials can be applied using this media; therefore, it must be combined with other learning media as support, and appropriate material must be chosen with consideration. The author hopes that this research can be used as a reference in future research for better results.
