ABSTRACT

Mohamad Adam Firdaus. 191230154. 2023. Busuu Application in Teaching Speaking Ability at Islamic School (Quasi-Experimental Research at the Tenth Grade of MA Ar Ribathiyah Ciukulur).

This study investigates Busuu Application in Teaching Speaking Ability at Islamic School. This research was conducted based on the statement of the problem: 1) How is the students' speaking ability of tenth grade of MA Ar Ribathiyah Cikulur? 2) how is the effectiveness of busuu application in teaching speaking ability? This study used a quasi-experimental method with two classes, namely class X A as the experimental class and class X B as the control class. After collecting the data, the researcher analysed the data using the t-test.

Based on the results, the researchers found the average pre-test in the experimental class is 35,5 and the average post-test value in the experimental class is 54,3. Meanwhile, the average pre-test in the control class is 35,75 and the average post-test value in the control class is 43,15. According the result of the data, the value of $t_{\text{observation}} (4,72) > t_{\text{table}} (2,02)$ in 5%, and $t_{\text{observation}} (4,72) > t_{\text{table}} (2,71)$ in 1%. So, H_0 is rejected and H_a is accepted. which means Busuu Application is effective in teaching speaking ability.

Key words: *Busuu Application, Speaking Ability.*
