

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on research on The Effectiveness of show and tell method to increase student's confidence in speaking skills of SMA Negeri 3 Pandeglang, the authors can conclude that:

1. The speaking skills of class XI students at SMA Negeri 3 Pandeglang before being given treatment are relatively low. They experience a lot of learning difficulties to be confident in speaking skill. This is caused by the difference in the learning system between English and Indonesia. However, students can increase their confidence in speaking skill. Researchers can see that the application of the show and tell method can make students comfortable and enthusiastic.
2. The results of the analysis of research data using the show and tell method have a significant influence on students' self confidence in speaking skills. It can be seen from the average value of the pre-test, the average value of data is 11,56667, the average value of the post-test is 16,8 and the average value of the questionnaire is 51,16129. The show and tell method can facilitate students' to increase students' confidence in speaking skill by reducing students' anxiety in speaking English and helping students speak freely because of the method.

B. Suggestion

After making the conclusion about the effectiveness of show and tell method to increase students' confidence in speaking skill, the researcher tries to give some suggestions, which are hoped can be valuable input in teaching speaking skill.

1. For teachers

Talking in classroom debate allows teachers to tackle challenges in the teaching and learning process. Students should be able to do several activities to improve their self-talk abilities. However, the most crucial role of the teacher is to educate students to talk.

2. For students

Students must be competent in the field of education since this is essential in both the educational and learning processes. In reality, uninspired students need a teacher who will keep them motivated until they fulfill the subject's objectives. Good reinforcement helps pupils maintain a good mindset and achieve great achievements.

3. For the school

The findings of this research may be utilized by schools, particularly in teaching English, to assist better students and teacher in the teaching and learning process, as well as reflexes that can stimulate students to enhance their speaking abilities further.
