ABSTRACT

Mega Tias Nur Afnia. SRN. 191230125. The Fluency of Story Completion Towards Speaking Skill (*A Quasi Experiment Research with The tenth Grades of SMAN 4 Cilegon*).

This study aims to determine the significant effect of story completion on speaking skills of tenth grade students of SMAN 4 Cilegon. In this study there are two variables, independent variable and dependent variable, story completion technique as independent variable and speaking skill as dependent variable. This research was conducted in SMAN 4 Cilegon. The population of this research is the 10th grade students of SMAN 4 Cilegon in the academic year 2023/2024 which consists of 5 classes. The total population of this study was 158. The sample of this study amounted to 60 taken from 2 classes (each class amounted to 30 students). The sampling technique used purposive sampling recommended by the school. Furthermore, for data collection using rubrics applied to a sample of 60 students. This research methodology uses a quasi-experimental design with treatment carried out in three meetings, 3 x 45 minutes for each class. From the results of the study, it was found that T_{observe} was greater than T_{tabel} at 5% significance ($2.27 > 1.67$), there was a significant influence between the two variables. So, it can be interpreted that H_a is accepted and H_0 is rejected. This it can be concluded that to improve speaking skill can use story completion technique.

Key Word : *Speaking Skill and Story Completion.*
