BAB V

CONCLUSION AND SUGGESTION

A   Conclusion

   The researcher comes to a conclusion that responds to the research question based on the study findings from the previous chapter. the findings of this study are:

1. Based on the interview aspects observed in this research, from three optional of interviews can be concluded that impilaction of spinning wheel aplication is Very good namely 98.75%, that included in Very Good category, the selection of spinning wheel application media with many answers agreeing and strongly agreeing with the results shows that the spinning wheel application media is a very useful medium. Mistakes in choosing media can make students feel bored and bored so that learning becomes less effective and difficult to understand. Therefore, selecting good and correct media is necessary through intensive search by the teacher and focusing on improving English vocabulary correctly, using good and correct learning applications will be much more useful and exciting. With this rotating wheel application, it is hoped that students' ability to read vocabulary will improve and they are expected to be able to answer tests better and more effectively.

2. Based on the result students test, that students' English vocabulary result are Pretty Good with precentage 74.19%. because it is supported by good media such as the spinning wheel application media and students have good vocabulary, mastery of relevant vocabulary, and understanding of test questions, even though they are not native speakers. Students can answered tests related to vocabulary with 74.19% correct answers, the use of appropriate media really helps the learning process so that students don't feel bored. Overall, this spinning wheel application helps students improve their English vocabulary effectively in achieving academic achievement. In this research, the spinning wheel application is very useful for students to use because it can be used offline and online so that when used offline students no longer bother buying internet packages. This shows that the spinning wheel application is very significant in increasing English vocabulary.

From the finding above the research can be concluded that spinning wheel aplication can improve students' vocabulary.

B Suggestion

Following the completion of this study, the researcher attempted to provide a number of recommendations that would be helpful to all

parties, particularly future researchers, English teachers, and students. The recommendations are included below :

1. For Student

    Improve yourself. Students need to improve themselves so that they can improve their English vocabulary individually and together, to identify each person's learning needs. And take it utilize each other's potential in increasing vocabulary. so that Students can use their cellphones to do more positive things, such as improving their English vocabulary through the spinning wheel application. These suggestions aim to help students take advantage their cellphones so that the cellphones they own can be used to improve their English learning achievement.

2. For teacher

    Teachers can develop and adapt different learning media when teaching and balancing focus on reflective and independent tasks with group discussions. provides a different approach to provisioning materials to support individual needs. Allow additional time or special settings. Students will feel happier when teachers teach using contemporary media instead of lecture media so that students tend to get bored. This Suggestions aim to create a more comfortable and

comfortable learning environment   supporting student learning achievement in English classes.

3.   Future researchers

Future research could consider using qualitative and Quantitative research methods to get a more comprehensive picture understanding of the analysis of the spinning wheel application in vocabulary learning. Besides that, Future researchers can develop valid and reliable research instruments to analyze the spinning wheel application media in learning English vocabulary. These suggestions can help future researchers in developing further   in-depth and comprehensive research regarding the spinning wheel application media in learning English vocabulary in the future.
