

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research findings that were presented previously, the researcher would like to present some conclusions based on the result analysis of the data, the conclusions are:

1. The response of students based on their experience towards the use of English Video Blogs (vlogs) as an alternative media for English-speaking practice gave a positive response. The overall result of students' opinions based on the questionnaire obtained a score of 74% out of 100% which shows that students agree with the use of English vlogs as an alternative media for their English speaking.

2. Through the results of interviews with students, it can be concluded that English vlogs have a positive effect on students' speaking skills, especially in terms of accuracy and fluency. This can be seen from the students' questionnaire and interview scores which are based on their experience in using English vlogs. English vlogs lead students to do self-evaluation, as they can analyze their own mistakes so as to grow their confidence in their speaking performance. Most students have a positive perception of the use of English vlogs in speaking class. They think that video recording can

train their speaking skills, especially in terms of accuracy and fluency. They can also overcome their difficulties in speaking English because by recording videos they can reflect on themselves to find out their mistakes. In addition, they agreed that they became more confident and fluent in speaking English after making video recordings and English vlogs for speaking assignments.

As a result, the researcher concluded that English vlogs can be used as a media in teaching speaking to improve students' speaking accuracy and fluency. This has a positive impact and positive effect on students' speaking performance.

B. Suggestion

After conducting research and obtaining research results, the author has several suggestions for readers including:

1. To students, it is best not to be embarrassed or anxious to try to speak English, do not feel afraid to make mistakes because it is part of learning and continuing to practice our English skills to be better than before. Some others said that we can because we are used to being used to practice. Then, if we already have a good learning experience from the teacher, or school should be applied in everyday life.
2. To the teacher, must be more creative and adapted to technology in teaching. So students feel that learning English is easy and fun. In

addition, the teacher must also pay attention to the development of the abilities of each student because it will have a positive effect on student motivation to improve their abilities.
