

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The research conclusions are the following,

Based on the findings and discussion in the previous chapter: The use of Wattpad media to improve students' reading comprehension. The Wattpad media helps students analyze and decide the meaning and content of what they read. Students are eager to learn English, especially to improve their reading comprehension skills. It also has a significant influence on the reading skills of class XI IPS MAN 2 Serang students.

The findings of this study can demonstrate the association between students' average pre-test and post-test scores. The pupils had an average score of 32,4333. The pupils' post-test average score was 61,9667. So hypothesis H_0 is rejected, while hypothesis H_1 is automatically accepted. As a result, using Wattpad media can help pupils improve students' reading comprehension skills.

B. Suggestion

After obtaining the research findings, the researcher would like to provide the following suggestions:

1. Learning using Wattpad media helps students enhance their reading comprehension skills. As a result, Wattpad media can continue to be developed and implemented in other disciplines to improve student learning outcomes.
2. For teachers, learning to use Wattpad media for reading can be one method of helping students enhance their reading comprehension skills in reading areas.
3. Researchers are more active in developing the learning activity process by using additional learning media that are appropriate for the subject or material to be taught in order to achieve better results.
4. Using Wattpad media encourages teachers to motivate students more so they can fully absorb the reading content.
5. Wattpad media will be more successful if the teacher guides each step that students must complete. In other words, the teacher uses Wattpad to guide student actions throughout the learning process.

Finally, the researcher understands that the thesis has flaws and is far from flawless. I am genuinely hoping for constructive feedback and input to help me enhance my thesis. Researchers believe that this research will be valuable to readers. If it is to be improved, I intend to use a variety of techniques, including better teaching and more advanced visual technologies.
