CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The researcher concludes this research to answer the formulation of the problem. The conclusion is based on the data finding and hypothesis testing:

1. There is a significant effect of using Wordwall.Net on students' vocabulary mastery at the tenth grade of SMK Darus Syifa Cilegon. It could be seen that the t-Test calculation result $t_o : t_t = 3,840 > 1,672$ in degree of significance 5% and $t_o : t_t = 3,840 > 2,392$ in degree significance 1%. Before the treatment, it is found that the mean (average) pre-test score of experimental class was 62.50, in contrast with the control class, the mean (average) pre-test score was 64.83. After the treatment, the experimental class's average post-Test score was 78.17, while the control class' average post-Test score was 69.17.

2. To make vocabulary mastery effective wordwall.net can be used because students like challenges, with this game students can work seriously because of their enthusiasm for something they don't know.

B. Suggestion

The researcher also suggested the English teachers, the students, and further researcher to improve English learning especially in vocabulary mastery and to improve the next advance research:

1. For English Teachers
   a. English teacher is advised to use various kinds of media that can help them in teaching.

b. The researcher suggests teachers to combine Wordwall.net activities with traditional teaching methods, incorporating offline activities and group discussions to create a balanced and engaging vocabulary learning experience.

2. For Students

   a. The students are suggested to take advantage of Wordwall.net activities to participate actively in vocabulary learning, embracing flashcards, quizzes, and games to reinforce understanding and retention.

   b. They should explore the features of language learning apps that allow them to progress according to their individual needs and comfort.

   c. They are suggested to dedicate consistent study time to review Wordwall.net materials, completing quizzes and engaging in self-directed learning activities to reinforce vocabulary skills.

3. For Further Researchers

   a. For the researchers, it is recommended conducting more in-depth studies on the impact of the Wordwall.Net in various educational settings.

   b. Researchers are advised to maximize the use of existing activities and templates, so that students can explore a variety of templates to increase student learning motivation, student imagination and student knowledge.

   c. Additionally, the researchers can explore the long-term effects of using Wordwall.net to determine sustainability.
