Mohammad Mizab Prasetyo. SRN.201230005. USING LEARNING TOGETHER (LT) IN TEACHING SPEAKING (A Quasi-Experimental Research at Second Grade of Madrasah Aliyah Al Hidayah Bani Karim, Lebak)

There are still many students at the Madrasah Aliyah level who are not yet able to speak, especially in speaking lessons. This research aims to find out whether using Learning Together (Lt) is effective in helping in learning speaking. This research uses quasi-experimental design and quantitative research methods. The instruments used in this research were pre-test and post-test. The researcher used 50 students as research samples among the eleventh graders of Madrasah Aliyah Al-Hidayah Bani Karim as the population. The findings in this study show that the sample test results indicate that  $0.001 < 0.05$ , rejecting  $H_0$  and accepting  $H_a$ , indicating a difference in average learning outcomes for students. As a result, it is possible to conclude that the learning strategies are effective.
