

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusions

After the researcher conducts the research in SMK Pariwisata Bandulu Anyer, the researcher would like to conclude the research findings as follows:

1. Teaching English language is given not only the theory from several linguists but also the practice how the theory works in students' daily real life. Most teachers in Indonesia do not get satisfaction result from their students' English achievement. This is because the students do not have a good motivation to learn English.
2. The research found that the students are able to understand the English future tense after they are introduced to English future tense and the "Song lyrics". From two cycles conducted by the researcher it is found that there is a significant improvement from the first cycle (52,83) to the second cycle (77,23)
3. In each cycle the students' maximal score is 70 to 90, the students' minimal score is 35 to 70, and the students' average score is 63,95 to 75,53. The researcher they stops the research the result of students have reached the criteria minimum; that is above 60 points.

B. Suggestions

After conducting this research with the finding presented above, the researcher intends to offer some suggestion which may be more useful not only for teacher but also for the learners

1. This research is hoped can be useful for researcher herself to find out the exactly condition of filed, problems of learning process so that it becomes references in preparing before facing the real condition.
2. For the students the usage of this method is hoped can help them to understand lesson easier especially simple future tense, because used of method is enjoyable.
3. For teacher, the usage of this method is hoped that it can make them more creative deliver materials, so that learning process in the classroom action not monotone and more effective.
