##### **3. The Development of Students' Speaking Ability at the First Grade VIIA of MTs Raudlatul Falah Tangerang**

The development of students' speaking ability indicated by students' test score was 15% from pre action research to the cycle I and 28% from the cycle I to the cycle II. There was the development also for students' mean score 3 points from pre action research to the cycle I and 6 points from the cycle I to the cycle II

### **B. Suggestion**

To make the research better than the writer's research, here some suggestions were given to:

#### **1. English teacher**

Teachers should have a technique or method of learning which relevant to the students' potential.

#### **2. Students**

Student as learner has to share with teacher or educator to make learning activity run well. They entitled to get good service to learn fun, happy, and comfortable.

#### **3. Researcher**

The writer suggested to the other researcher to search more reference about three-step interview than she/he could apply the technique completely.
