

CHAPTER V

CONCLUSIONS AND SUGGESTION

A. Conclusions

Based on the experiment that was given to the students at the class VIII D. it is using Cloze Procedure Technique to improve students' reading comprehension is the way to improve the student achievement reading. Based on the result of the research, the writer can take the conclusion,

1. Many students are lack of ability in comprehending English texts, they fail in comprehending information from reading materials, difficult to read, and the motivation to read is very low, because the technique in teaching learning is bored for students.
2. Applying the cloze procedure to the teaching of reading comprehension, it is important that teacher minimize the testing aspects and maximize the teaching ones. As mentioned above, in standard cloze tests, a uniform-sized blank is used for each deleted word so as not to give any indication of what the deleted word is. In the teaching situation, though, it is desirable to increase the amount of information available to the student, so as to increase the student's chances of guessing.

By using Cloze Procedure Technique, the students will know how the application of Cloze Procedure Technique in teaching reading at SMPN 02 Karangtanjung and more participating and active in learning and teaching process and

helps them to communicate it. English will be solved finally, the student will not easy to get bored or forget the meaning of the word that have taught in the class because using Cloze Procedure Technique in teaching and learning process and also testing using Cloze Procedure Technique it's make them feel enjoy, fun and relax in doing testing reading comprehension mastery.

3. The students' achievement in reading at the second grade of SMPN 02 Karangtanjung was under the standard before the researcher conducting the research. However, after conducting this research by using Cloze Procedure Technique, the students' achievement in reading comprehension was improved. It can be seen from the result of control class is mean of pre test score 59,6 and post test 85,9. The result of experiment class mean of pre test 65 and post test 95.

B. Suggestions

With the presented conclusion, several suggestions for increasing reading comprehension, there are:

1. Reading is one of skill of language and it is very important, so to English teacher must be creative and give more understanding to the students about the important of reading, especially in reading comprehension, by using close procedure technique could be a creative alternative to develop the students' reading comprehension in English class. could make

the students becomes self confidence in his efforts to become more proficient reader.

2. For the students of SMPN 2 Karangtanjung, especially the second grade, must be increase and improve students' reading comprehension, one of ways is by following cloze procedure technique, because it is make easy to understand reading comprehension, especially in narrative text.
3. For the head master of school, give more motivation to the students in learning English.
4. Further the research should be conducted in other classes or school to have a wider generalization of the result of the study.
