To answer the questions, the writer uses quasi experimental method in this research. The writer collects data from 50 students spread into two classes, one class as experimental group and the other one is as the control group, by applying experimental research method. The population is the first grade of MA Darunnajah 14 NurulIlmi, Serang 2016-2017, while class X A as the experimental group and class X B as the control group are taken as the sample. Since the research uses writing test involve pre-test and post-test to know the students’ writing skill.

The result of the research states that H_0 is rejected and H_a is accepted. After collecting and calculating the data, the value of $t_o : t_t = 14,12 > 2,01$, in degree of significance 5% and $t_o : t_t = 14,12 > 2,68$ in degree of significance 1% so that H_a (alternative hypothesis) of the result is accepted and H_o (null hypothesis) is rejected. It means that Using of CSW Game has significant influence on teaching writing descriptive text than without using CSW game method. Based on the findings of this study, it found that Using of CSW game strategies has effective and applicable at the first grade of MA Darunnajah 14 Nurul Ilmi, Serang.
