

## ABSTRACT

Name: **Fahmi Hamidi**, NIM: 123400198, thesis title: **“Method Home Visit In Improving Attention Parents in Children”** (SMP Islam Studies at An-Nur village YAPKIN Cage, Desa Bakti Buni, Babelan subdistrict, Bekasi Regency). Department of Islamic Guidance and Counselling, Faculty of Islamic Theology, Preaching and Adab IAIN Banten Sultan Maulana Hasanuddin.

As humans, teens have a variety of needs that demands to be met. It is a source of occurrence of various problem in adolescents. Problem teenagers are the problems faced by adolescents in relation to their needs within the framework of the adaptation to the environment in which teenagers were alive and growing. As for the existing problems in adolescents are very prominent in these days is a matter of faith and morals, sexual problems, problems of personal and social development. Not only due to the internal factors including birth defects, fulfillment of basic kebutuhan unbalanced with the wishes of children, are less able to adjust to the environment, or external factors are a family and the environment. Lack of attention from parents or guardians of students can make one trigger of student misbehavior. Delinquency is happening in SMP Islam YAPKIN An-Nur, namely smoking, fighting, ditching, and came too late. Parents play an important role in increasing attention to the child, therefore, one of the methods used in order to solve is the method of home visit. This study aims to determine the forms kenakaln students in SMP Islam YAPKIN An-Nur.

From the above description, the formulation of the problem in this research are: 1). What problems are there in the junior high students at An-Nur Islamic YAPKIN? 2). How the home visit services in improving the attention of parents to children?

The purpose of this research are: 1) To determine what problems exist in the junior high students at An-Nur Islamic YAPKIN. 2) Determine home visit services in improving the attention of parents to children

This study used qualitative methods, data collection techniques used were observation, interviews and documentation.

The results of this study is to service the home visit is able to increase the attention of parents to their children, this can be seen by the frequent parent berkomunikasi with the school intensely, and parents trying to pay attention her son by delivering directly to the school.
