

CHAPTER V

CLOSING

A. Conclusions

Based on the writer finding that was presented in the previous chapter the writer would like to give some conclusions as follow:

1. From the result of pre-test and post-test between experiment and control class, the writer can conclude that before giving treatment, the score of students' writing narrative text were low and it increased after giving the treatment. The score of experiment class is better than score of control class. It can be shows from the result of data analysis that mean of control class 59, 06 and the mean of experiment class 70,19. After giving treatment. It means that the mean of experiment class is good category.
2. Base on the analysis, it was known that according to the data, the value of $t_{observation}$ is bigger t_{table} . $t_{observation} = 8,54 > t_{table} =$

1,99 (5%) or $t_{observation} = 8,54 > t_{table} = 2,65$ (1%), so H_0 is rejected and H_a is accepted. It means that wordless picture books media is effective in students' learning writing narrative text.

B. Suggestion

According to the conclusion above the writer would give some suggestions as follows:

1. For the teacher

The teacher should be creative in developing English learning process in the classroom. The teacher should use various media in teaching English in the class in order to make students interest and mastery the material well.

2. For the students

The students should learn English more especially practice to write English text, such as create the sentences and develop the paragraph.

3. For the next researcher

It is suggested to other writer, to complete this research by conducting any other research by using media in learning

process. The writer would like to suggest that result of the study can be used as an additional reference for further research with the different sample and occasions.
