CHAPTER V

CONCLUSIONS AND SUGGESTION

A. Conclusions

Based on the writer finding that was presented in the previous chapter the writer would like to give some conclusions as follow:

1. From the result of the pre-test and post-test between experimental class and control class at eleven grade of SMAN 8 Serang, the writer can conclude that before giving treatment, the score of students’ listening skill narrative text was low and it increased after giving the treatment. The score of the experimental class is better than a score of the control class. It can be shown from the result of data analysis that means of the control class is 69,66 and the mean of experiment class is 94,33 after giving treatment. It means that the mean of experiment class is a good category.

B. Suggestion

After making conclusion the writer tries to give some suggestion which is hoped can be valuable input in teaching listening skill narrative text, bellow is suggestions:
1. The students of SMAN 8 Serang can improve their listening skills with confidence and they are able to express themselves more in listening.

2. The teacher should be creative in English teaching-learning process in the classroom to make students more interested in learning English and master the material well.

3. Youtube video can be applied in the English teaching-learning process as one of the innovations, in the teaching-learning process. Particularly to improve students' listening skills. When they explain the topic they are more enjoyable when using Youtube Video.
