

CHAPTER V

CONCLUSION AND SUGGESTION

1. Conclusions

Based on the researcher finding that was presented in the previous chapter the researcher would like to give some conclusions as follow:

1. From the result of the pre-test and post-test between experimental class and control class at ninth grade of MTs Al-Hidayah Pandeglang, the researcher can conclude that before giving treatment, the score of students' writing procedure text were low and it increased after giving the treatment. The score of experimental class is better than score of control class. It can be shown from the result of data analysis that mean of control class is 58,86 and the mean of experiment class is 75.6 after giving treatment. It means that the mean of experiment class is good category.
2. Based on the analysis, it was known that according to the data, the value of $t_{\text{observation}}$ is bigger than t_{table} . $t_{\text{observation}} = 4,51 > t_{\text{table}} = 1,67$ (5%) or $t_{\text{observation}} 4,51 > t_{\text{table}} = 2,39$ (1%), so H_0 is rejected and H_a is accepted. It means that YouTube video had significant effect in students' learning writing.

B. Suggestion

1. School

Based on the finding, researcher suggests the school especially MTS Al-Hidayah provide more program where students can improve their skills in writing. Exercising must be the main task for the students especially for student class ninth, because it can improve their Writing skill.

2. The students

The students need to enrich their studying in understanding the subject. They also need to increase their self-confident when studying the subject. The students have to know if writing is really important in English. It can improve many skills especially in writing skill. So they must be more serious in preparing the test.

3. The Teachers

For the lectures, it is hoped that this research can encourage them to consider a better way in improving students' writing understanding. Lectures have to inform the students how to be mastered in writing strategy.

4. Other Researcher

For the next research relating to this topic, There are still many strategies which can be improved about writing. Finally the researcher hope the

result of this study may be used as early information to conduct further researches.
