

CHAPTER V CONCLUSION AND SUGGESTION

A. Conclusion

In this chapter, the writer would like to conclude of the research based on the data obtained and the hypothesis submitted at the previous chapter as follow:

1. Before the writer gave treatment both of experimental class (XI MIA 2) and control class (XI MIA 3), the writer got mean score of pre-test from experimental class was 62,16 and control class was 58,16. It means that the students' speaking in Al-Falah Islamic Senior High School at second grade taken as sample of the research have relatively same both experimental class and control class. After the writer giving treatment by using Suggestopedia method for XI MIA 2 as experimental class and without Suggestopedia method for XI MIA 3 as control class, the writer got mean of post-test score from experimental class was 79,26 and control class was 70,53. It can be seen that students' speaking skill got different increase. Experimental class got higher increase after giving treatment than control class.

2. The use of Suggestopedia as a method to improve students' speaking in Al-Falah Islamic Senior High School has been showed that means score from experimental class after giving treatment as new method got higher score than control class (79,26 and 70,53). In addition, the writer got the result from the calculation that the value of t_{obs} is 5,52 and df is 58. According to t-table as degree significance of 5% = 1,67 in degree of significance 1% = 2,39. After that the writer compared the data with t_t (t table) both in degree significance 5% and 1%. Therefore $t_o:t_t = 5,52 > 1,67$ in degree of significance 5% and $t_o:t_t = 5,52 > 2,39$ in degree significance 1%. It means that H_1 (alternative hypothesis) of the result is accepted and H_0 (null hypothesis) is rejected.

Based on the fact above, the writer can summarize that the use of Suggestopedia method has significant effect to increase students' speaking in Al-Falah Islamic Senior High School.

B. Suggestion

Based on conclusion above, it can be delivered some suggestion that might be useful. The suggestion are for teacher and students. As follows:

1. For Teacher

- a. The writer hopes this study some alternative in improving students' speaking skill by using Suggestopedia method.
 - b. In studying speaking at the classroom, the teacher is hoped more creative in teaching students to increase teaching learning process and make students active in learning.
2. For Students

he students should practice more, especially in speaking to more correct about spect of speaking skill such as accent, grammar and vocabulary can be reached.

 - b. This media give students opportunity to feel relax in study to think critically and also requires the students to be active.
 3. For other researcher

The writer hopes that this research could be one of the references in conducting some research for better result.
