

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

Based on the finding and discussion of the research, it can be concluded that:

1. There are some difficulties of students in speaking English such as vocabulary, grammar and pronunciation. Vocabulary becomes the big problem in speaking English because many students don't have a lot of vocabulary.
2. There are some factors that make students feel difficult in speaking English they are: Lack of vocabulary, lack of grammar, less practice, not confident and environment. According to the data that describe "Lack of vocabulary" become the biggest problem that make students feel difficult in speak English.
3. There are 36% or 9 respondents choose to be more "Practice" in speaking English. This will be the most effective way to habituate speak English in daily life as reported by one of respondent.

B. Suggestions**1. For the teacher**

Especially to speaking lecturer, keep on giving some motivation for students to make them feel enjoy when study English. Always invite the students to apply the English with practice by continue and improve their skill especially in speaking English.

2. For students

Generally for all students of the State Islamic University Sultan Maulana Hasanuddin Banten, and especially for English Department Students. Do not feel bored to practice because practice is the key to better. Then, do not be shy to share or consult with teacher if found the problem in English, invite other friends to use English in any activities because it can help to improve their confidence to speak English.
