

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the writer's research about the effectiveness of using Authentic Materials to improve students' writing ability, the writer can conclude that :

1. From the result of the pre – test and post – test between experimental class (using authentic materials), and control class (without authentic materials) the writer can conclude that experiment class is better than control class. Authentic materials can improve students' writing procedure text in this school. It can be seen from students' spirit in studying procedure text.
2. After the writer see the result of writing procedure text pre – test and post – test, the writer concludes the students' in experimental class get better score than the students' in control class. The result showed that t_{table} with level significance 5%=2,00 and with level significance 1% =2,66 so $t_{account} = 10,5$. So, $2,00 < 10,5 > 2,66$. It means that $t_0 > t_t$, and the writer conclude the alternative hypothesis is accepted. It means that there is significant effectiveness of using Authentic Materials in improving students' writing procedure text.

B. Suggestions

There are some suggestions offered according to the result of this research, for instance:

a. For the School

1. School should provide the complete equipment to reach the goals, especially in English, in order to get smooth-running in teaching-learning process.
2. School should provide some activities to develop students' skill, especially in writing.
3. School consider about the advanced knowledge and technology to develop their teaching style.

b. For the Teacher

1. Choosing technique in teaching English was very important because some people consider that learning English was difficult, for the teacher most appropriate method in English.
2. Teachers should function Authentic Materials to attract students' attention and motivation, so it leads to improve students' understanding on the material.
3. The teacher may be used creative and interesting technique in the process of teaching. Especially in writing skill activity in order to encourage motivate students to have more practice in writing skill.

c. For the Students

1. Students should memorize vocabularies because it is very useful to help them in learning English

2. Students should practice more in order to improve their ability in writing English.
- d. For the next researcher
1. Other research can continue and develop this research to give more significant information to the readers.
