CHAPTER V

CONCLUSION AND SUGESTION

A. Conclusion

Based on the analysis of the data, the researcher concluded that the type sound changes that the researcher found. The first is lenition and fusion were in the top rank in the most frequent sound changes . The total number cases of lenition and fusion is 7 cases or 43,75 %. The second one is syncope total 5 cases or 31,25 %, weakening sound total 2 cases or 12,5 % , and the last rank is sound addition and unpacking with only one cases or 6,25 %.

B. Suggestion

Refering to the conclusion above, the writer provided some suggestion, such as:

1. For the teacher

   a. The teacher should must teach english hard, especially in pronounciation.

   Because the student was lack about knowledge in pronounciation, especially diphthong.

b. The teacher can gives more method of learning in english lesson to make the students happy and confortable in learning process.

2. For the student

a. The student should be given a lot of drill to improve their. pronounciation.

b. The student can learn with the english song or movie. Because from the song or movie, there is a lot words and they can listen and practice from that so the student can get improvement.
