CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the analysis of the data, the writer concluded that:

1. The online students of Myelin course still often made errors in pronouncing diphthong. The diphthong /ʊə/ and /eə/ was the most difficult for the online students, because all of them made errors when prounounced it. This can be seen from total percentage error words: *Tour, Cure, Pure, Careful, Care* and *Hair*. On the other hand, there were four words that online students can read them well such as: *make, time, sky, how and boy*. They can read them well because these words have same sounds with Indonesian.

2. The writer found that learning by online during covid 19 pandemic there were have not problems to teached online stduents, the online students have spirit to learn English but they still do not fully understand about pronunciation

well, especially in diphthong vowel. In addition, the online students can not pronounce diphthong correctly. It caused by the inconsistency between the written words in English and the sounds. They consider that pronouncing diphthong is difficult and diphthong is unfamiliar. They also did not use it in daily conversation.

B. Suggestion

Referring to the conlusion above, the writer provided some suggestions, such as:

1. For the Teacher

The teacher should find other technique to teach English pronunciation, therefore the teacher understand and have good ability either in skill and English component. The teacher always give motivation for online students in leraning English especially in pronunciation. The teacher should more focuss in learning English pronunciation.

2. For the Online students

The student's should realize that English and Indonesian have different rules in pronunciation, should to master more English pronunciation, they need to practice and learn more about English especially pronunciation and they should be given a lot of practice to improve their pronunciation. The online students must have high motivation in learning English especially pronunciation.
