

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusions

Based on the research of the study, there were several important information taken from the research finding as conclusion of the study. It could be concluded that :

1. The conclusion that from all the elements Toulmin model argument, especially essential components of the practical argument “claim,” “evidence,” “reason,” most of the students had been considered successful in argument structure used in writing their argumentative essay.

2. The conclusion that the students had applied the critical thinking well. From the beginning of the interview, it was clear that all students chose a good topic for their argumentative essay. Therefore, writer considered that the students had applied critical thinking well. The second aspect of the interview determined that the writer had successfully applied critical thinking in constructing their argumentative essay by using an orderly good organization of argumentative essay and presenting the reasons well. The third aspect of the interview revealed that students were also considered

successful in developing critical thinking skills to resolve issues that they experienced in writing the essay.

## **B. Suggestions**

Based on the conclusion above, suggestion are stated as the following :

1. It is suggested that the student who are studying argument can increase their understanding about structural argument and critical thinking well.
2. For the next researcher who are interested in argument, it will help to find many theories and analyzing the data.
