

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, after knowing finding and discussion, the researcher will give a conclusion and suggestion.

A. Conclusion

Based on the data finding and result obtained, the researcher draws conclusions as follow:

Students' perception toward English E-learning during covid-19 pandemic is quite good, because the process of learning English is easier with E-learning and also a good alternative way to do learning in the era covid-19 pandemic. They also argue this method is quite effective for learning English, because the English material delivered by the teacher through E-Learning easy to understand, in addition their English skills improve while learning through E-Learning. Although students give positive perception, they found problems in implementing English E-learning, such as internet signal, quotas and rarely of question and answer interactions during online learning.

Students' motivation toward English E-learning during covid-19 pandemic. Most of students stated that learning English

through E-learning is quite good motivating and interesting. It can be seen from most of students ask the teacher when they have difficulty in learning English through E-Learning, and some of students asks to the friends, search on Google and Youtube, students keep learning English even though they don't have assignments during E-Learning, students feel lost out if they don't take English learning through E-Learning and they realize the importance of learning English while at home. Although most of students stated that learning English through E-learning is motivating, some of them think that learning in class directly is more fun because they can interact directly with the teacher and also many friends.

B. Suggestion

After concluding the research, the researcher would like to give some suggestions that can be considered as follow:

1. For the teacher

The teacher should more often to conduct question and answer activities about English material so that the teacher can measure the extent of students' understanding of the material given. Teacher must know an appropriate and more

up-to-date learning media in learning E-Learning is also an important factor to motivate students so that the spirit of learning, especially in learning English is considered quite difficult by many students.

2. For the students

Students can further enhance the interesting of learning English by several ways such as ask the teacher when you have difficulty in learning English material. Students are expected to keep learning English even though you don't have assignments, students also expected to be able to take advantage of learning English through E-learning during pandemic era because it is the only way out to keep learning online as long as the Covid-19 pandemic.

3. For other researcher

This research is expected to benefit other researchers and as a reference or inspiration to conduct further research related to this field.
