BAB V
CONCLUSSION AND SUGESSTION

A. Conclussion

Based on the result of analysisi and discussion of the data, the authors get conclusions that can be drawn from research on Designing Learning Media Animation Video In Facilitating Student Learning Speaking;

1. The results of this study indicate that 95,56% of the feasibility of the product from material experts and results of this study indicate that 82,67% of the feasibility of the product from media experts in designing learning media animation video in facilitating student learning speaking in the excellent category, which means the product is valid and suitable for use in the process of learning activities in class and it can be concluded that this product is efficient, attractive and can facilitating student learning speaking.

2. The results of the successful test show that 97,24% is the response of users or students. This means that the product designing learning media animation video in facilitating student speaking has a good perception on students so that students can develop speaking.

B. Suggestion

The expected benefits of the results of this study includes;

1. For the readers, the results of this study are expected to be able to broaden the knowledge of science, especially in teaching materials that are developed using animation video.

2. For teachers, it is hoped that this research product can be used in teaching and learning activities in class or can be learning media using animation video to get a new and enjoyable learning atmosphere and the times schedule in the process of teaching and learning more costumized.

3. For the next research, it is hoped that the research can be continued by developing learning media using animation video or the next researcher can allow it to be continued up to the implementation and evaluation stage.
