

CHAPTER V

CONCLUSSIONSS AND SUGGESTIONS

A. Conclusions

Based on learning data and result, the zoom application in listening learning is said to be able to support students' online learning processes. Starting from their experience using the zoom application as an online learning platform and the only problem in it is when there is signal interference.

1. Students look more enthusiastic and interested in participating in the learning process. On the other hand, researcher can answer both studies improvement of students' listening skills using the zoom application as a media show that students can improve their listening. Other evidence of student improvement is gathered from interviews with several students. It aims to see students' perceptions of application of zoom application as a medium to improve their listening skills. In this case, the researcher also shared several questions to be answered.
2. Students gave a positive perception of the application of the zoom application as a media can improve listening skills. Students also remain active in the classroom during the online learning process, that this application is quite helpful and supports students in learning online. This can be seen from many students who can understand the explanation given by the teacher.

B. Suggestion

Research conducted by researcher at this time has provided how the implementation of zoom Application in teaching listening skills.

For student

1. Students must improve their knowledge in the online learning process and better understand the media used by teachers.
Student must be able to make the best use of lectures listening to improve listening skill
2. Students are also expected to be more practice a lot of communicating with classmates using the language English and it would be better if you try to communicate with native speakers directly or indirectly by means of listen to songs/music and watch movies/videos in English.

For teacher

1. it is better to use more teaching methods for example by using zoom application such as for media online learning. This will make education become more interested.

For other researcher

1. especially in the field of English who also want to researching about listening can be use this research as a.
