Data was obtained and analyzed qualitatively from President Joe Biden's twenty-one-minute speech. The speech is 2552 words in length. The results suggest that all processes in speech use ideational function in it is a transitivity system, with the relational process being the most prominent, followed by the mental and behavioral processes. Furthermore, the findings of the modality analyses indicated that the use of the general tense in speech was simple present and simple past with first and second pronouns as participants, with no third person singular.
